Forecast for Saturday 30 Apr 2022

Weather: Dry overnight with higher cloud spreading from the west. Cloud thickening and lowering from the west early morning, bringing occasional rain from late morning which lingers through the rest of the day. The bulk of the outbreaks will be light and patchy, particularly across northern ranges, also more widely from mid-evening.

Chance of cloud-free hill tops above 800m: 80% becoming from mid-day 15% in south and 30% in north.

Low cloud and visibility: Good becoming moderate or poor in rain, very poor in hill fog with bases becoming from mid-day extensive in the south and broken in the north from 600m with patches lower down in the south.

Met Office Aberdeen Meteorologist's View
Some difficult conditions as hill fog becomes more extensive at height from mid-morning, while the strong winds bring a significant wind chill effect.

Forecast for Sunday 01 May 2022
Weather: Cloudy with patchy light rain at first, then gradually turning drier and brighter from mid-morning. Perhaps a few afternoon showers bubbling up.

Maximum wind: Variable 15mph or less.

Chance of cloud-free hill tops above 800m: By day 30% increasing 75% for the afternoon.

Low cloud and visibility: Good, becoming moderate or poor in rain and later showers, very poor in hill fog with bases extensive at first becoming scattered for the afternoon from 600-800m.

Temperature: **Glens:** Plus 4 Celsius increasing 16 Celsius during the afternoon
At 800m: Plus 3 Celsius increasing 7 Celsius during the afternoon
Freezing level: 2000m
